
BRUNSWICK COUNTY LANDFILL

Policy for Acceptance of Asbestos

◆ **Asbestos** may be received only at the Brunswick County Construction and Demolition (C & D) Debris Landfill in Supply, and no other County solid waste site. Asbestos must be packaged in accordance with N.C. Solid Waste Management Rule .0505(11)(d) and federal code 40CFR61 that state:

- Asbestos must be wet down,
- While wet, asbestos must be placed in leak-tight containers or wrapping,
- Asbestos-containing containers or wrapping must be labeled as Asbestos-Containing Material in a clear and readily visible manner.

Above are the minimum requirements that a party bringing **asbestos** to any landfill in North Carolina would have to meet. The Brunswick County C & D Landfill requires that the following additional requirements must be met *if asbestos is placed in a leak-tight wrapper rather than a container*:

1. The leak-tight wrapper must equal at least 2-mil plastic in thickness (Example - one bag of 2-mil plastic or two bags of 1-mil plastic).
2. The leak-tight wrapper must be sealed.

Customers are required to call the Brunswick County C&D Landfill at (910)-253-8101, 24 hours prior to bringing in any asbestos. If loads are brought in without prior authorization, the load(s) will be rejected.
