

More THAN A Trail

IMPORTANT INFORMATION ABOUT THIS MAP

Trails on this map are designated routes for travel, typically along a roadway. Please be aware that the trail bike routes depicted on roadways require cyclists to share the road with vehicles. Many roadways experience high vehicular traffic volumes. Inexperienced cyclists will not be easily accommodated on these on-road bike routes and not likely to be comfortable on roadways with high traffic volumes. Trail bike routes on neighborhood streets (primarily shown on Town insets on reverse side of map) can be used for a safer experience. Users are strongly urged to plan your trip accordingly to ensure that your travel route is consistent with your biking skill level and experience.

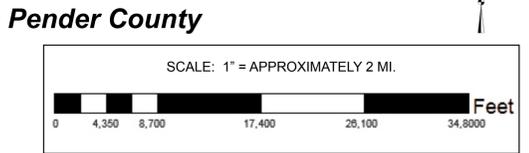

Off-road greenway style and pedestrian-friendly facilities are limited to the Brunswick Forest Multi-Use Trail, the Brunswick Riverwalk at Belville, and the Carroll Street Bike Trail and are labeled on the map. Parklands and Preserves that have off-road facilities for walking and biking are identified on the map and in the legend with corresponding Letters A through U. Pedestrian users should utilize these off-road facilities.

Please refer to and adhere to all Trail Safety & Etiquette Tips as well as to all Paddle Trail Tips located on reverse side of this map.
